

HAPPY CHRISTMAS!

This gift has security settings, but they may not have been optimised. To stop hackers accessing your network, camera, Bluetooth or location, take a moment to check the following before using:

- **Change the default password and replace with a unique, complex password of your own.**
- **Disable webcam, location tracker, or Bluetooth unless absolutely necessary.**
- **Check the privacy settings to ensure that notifications are only being sent to social media if you want them to.**

Instructions on how to do the above should be available in the product manual. The full article, including ‘Six Tips for Security Savvy Consumers’ can be found at <https://www.layer8ltd.co.uk/6-tips-Security-savvy-consumers>

LAYER 8 facilitates the adoption of more secure mindsets that will protect generations to come. Check out the **Layer 8 Toolkit**® an online communications suite filled with everything you need to activate your human firewall!
